

SPECIFICATIONS

MASONRY MORTAR B3

Is a light gray single-component premixed mortar based on hydrated lime, hydraulic binders, selected sands and special powder additives. Thanks to its particular composition, the plaster obtained by mixing Masonry Mortar B3 with water has a good quality adhesion and is particularly suitable for application with plastering machine on almost all substrates. Masonry Mortar B3 is classified according to the European standard EN 998-2.

TECHNICAL DATA

Product identity

Consistency: powder

Color: grey

Maximum size of aggregate (EN 1015-1) (mm): 2.5

Bulk density (kg/m³): 1,500

Chloride content (EN 1015-17) (%): < 0.05
